

QUICK START GUIDE

Dyna Boost

ALMOST CLEAN BOOST

POW:

HOW LOUD WOULD YOU LIKE THAT BOMB TO EXPLODE?

IT' A PRE VOLUME. THE MORE YOU CRANK IT, THE MORE YOU DRIVE THE TRANSISTOR.

WE LIKE TO CALL IT AN "ALMOST CLEAN BOOST" BECAUSE IT DOESN'T ONLY ACT AS A MASTER VOLUME, BUT IT ALSO CLEANS SOME OF THE UNDESIRE LOW MIDS IN YOUR TONE.

THAT'S HELPFUL TO CUT THROUGH THE MIX, AND ALSO TO KEEP THE BASSIST AS YOUR FRIEND.

RECOMMANDATIONS:

- CRANK IT A BIT TO GET THE BEST OUT OF YOUR TUBE AMP
- POW CONTROL UP 25%: ADDS 3DB
- POW CONTROL UP 50%: ADDS 9DB
- POW CONTROL UP 75% OR MORE: ADDS 12DB
- WE KNOW YOU DON'T NEED ANY PAPER TO USE THAT PEDAL, BUT IT'S COOL TO FIND GOODIES IN THE BOX. ISN'T IT ?

*** 9V ADAPTER REQUIRED (REGULAR CENTER NEGATIVE)**
